Description:

Abstract: The Ace Basin National Estuarine Research Reserve (NERR) digital boundary was created as part of the Protected Areas Geographic Information System (PAGIS) project. An updated digital version of Ace Basin's boundary was critical to the PAGIS project. The digital boundary was delineated from management and research areas within the Reserve. It was not based on legal definitions.

Purpose: The PAGIS project provided each NERR with a fully integrated geographic information system (GIS), encompassing spatial data and Internet capabilities. One of the essential GIS data layers being compiled for each Reserve was a digital boundary. The Reserve boundary was delineated based on management and research areas and is not meant to be a legal description of the Reserve.

Supplemental Information: This boundary is not to be taken as a legal definition of the NERR boundary. It was created based on management and research areas of the Reserve.
